

Sub B1

2 (Amended) The mixed resin compound as defined in Claim 1, wherein said mixed resin comprises (A) at least one resin component selected from a polyamide resin obtained from metaxylylenediamine and adipic acid, a polyamide resin obtained from  $\epsilon$ -caprolactam, and an ally resin obtained by blending a polyamide resin with a resin having a water absorption no higher than 0.3%.

**Please add the following new claims:**

57. A mixed resin compound in a desired shape formed by injection molding from a molding material containing a mixed resin composed of at least one polyamide resin and at least one resin having a water absorption no higher than 0.3%, wherein said resins are mixed in pellet form and the resulting mixture of pellets is injection-molded.

a9

58. The mixed resin compound as defined in Claim 1, wherein said resin having a water absorption no higher than 0.3% is at least one resin selected from the group consisting of polypropylene, polyphenylene ether, and polyphenylene sulfide.

59. The mixed resin compound as defined in Claim 1, wherein said resin having a water absorption no higher than 0.3% is polypropylene.

60. The mixed resin compound as defined in Claim 1, wherein said resin having a water absorption no higher than 0.3% is polyphenylene sulfide.
